Re: Proposed Exploration Operations, Metalliferous Minerals, ML-46626

Dear Mr. Jacobs:

On August 5, 1994 we received notice from the School and Institutional Trust Lands Administration (SITLA) that you are proposing doing exploration on a mineral lease (ML-46626). SITLA informed you that you needed to contact this agency regarding additional permitting requirements for your proposed operation. Three weeks have passed and we have not heard from you regarding this operation. We must inform you that you may be operating in violation of the Utah Mined Land Reclamation Act, if you are conducting mechanized mining-related activities without prior notice and acceptance from this office.

We have enclosed a Notice of Intention to Commence Exploration Activities (form MR-EXP) for you to complete and submit to this office, if you are still planning to go ahead with your proposed exploration. The rules require a minimum of 15 days advance notice before commencing any activity. We suggest that you complete the enclosed form and return it promptly if you are contemplating doing any exploration or mining on your state mineral lease. Also enclosed is a map showing the lead Division of Oil, Gas and Mining (DOGM) contact person assigned to various areas of the state. Accordingly, please direct your response to the appropriate DOGM contact.

If we can assist you in any way, please contact us.

Sincerely,

*Joelle Burns for*

RE: ML 46626--Metalliferous Minerals

Dear Mr. Jacobs:

The Trust Lands Administration has reviewed your proposed exploration project upon lands within the above numbered lease. It has been determined that a cultural resources survey is necessary prior to your commencement of operations. The survey must be completed by a qualified consultant, at Lessee's expense. I am enclosing a list of approved archaeological consultants. Please submit a copy of the consultant's report to this office upon completion. You will then be notified regarding any cultural resource problems which may be identified.

The Trust Lands Administration also requires that you submit a bond in the amount of \$2,000 to ensure the reclamation of surface disturbances from operations. The bond may be in the form of a surety, using the enclosed bond form, or a short term certificate of deposit listing the Trust Lands Administration as joint owner. The bond must be issued by a Utah licensed company or bank.

Finally, I have not yet received notice of any contact with the Utah Division of Oil Gas & Mining regarding this project. Please immediately notified DOGM of your proposed operation if you have not already done so.

Please contact me if you have any questions.

Sincerely,

JOHN T. BLAKE  
MINERAL RESOURCES SPECIALIST
